COMPANY

Maddalena is one of the most important international companies in the water metering and thermal energy metering instruments field.

Founded in 1919, the company has never stopped developing its organizational structure and its range of domestic and large user meters to meet the demands of the main water utilities worldwide. It is now manufacturing over three million meters every year.

The company has been awarded the title of Historical Brand of National Interest, testifying to its outstanding value and the leading role it plays in the Italian industrial culture.

INNOVATION

- **RESEARCH AND DEVELOPMENT**

A team constantly engaged in product and process development, focussing on legal metrology and remote data communication.

- **CUSTOMER COMMITMENT**

The ability to effectively meet customer requirements, relying also on integrated advanced logistics solutions.

- **SUSTAINABILITY**

Ambassador to the culture of water measurement, Maddalena contributes to improving water efficiency throughout the world.

RELIABILITY

All measuring instruments are certified according to the MID Directive and hold all main international health certifications.

The company has an in-house calibration laboratory accredited by ACCREDIA.

Maddalena is a member of several national and international smart metering industry associations.

The most prestigious international certifications testify to the quality of both products and processes.
